WORK EXPERIENCE

Dukaree Innovation, Kenya

June 2021 – Aug 2021

Frontend Developer (Industrial Attachment)

- Implementing user-facing features for the company's sales force automation system, Dukaree Enterprise, which seeks to automate all field-sales activities by tracking & managing inventory, sales, and revenue.
- Maintaining and updating systems and databases for the company's clientele.

PROJECTS

Native, <https://native-newsapp.herokuapp.com/>

- A Canadian news website that lists and previews news articles from various sources using the News API
- Built using Flask and Heroku

Limelight, <https://limelight-80a7a.web.app/>

- A platform created by a small group of us at a coding bootcamp to inspire each other with some healthy competition. Built using Firebase, Vanilla Js, HTML & CSS

CO-CURRICULAR ACTIVITIES

Google Developer Student Club, Moi University

Aug 2021 – Aug 2022

Technical Lead

- Training 100+ students to code and build solutions using Google technologies and other technologies.
- Conducting soft skills workshops to grow all-rounded developers: Ask Me Anything event series where we had industry professionals address various non-technical topics.
